

Ventilation for High Performance Commercial Buildings

Thursday, April 12, 2018—9:00 am-4:30 pm

Ventacity's products enable HVAC engineers to design buildings that reduce energy use by 50% by separating ventilation from air conditioning and applying heat recovery technology along with heat pumps to a building.

Fujitsu Training Academy
Air Purchases, Inc.
24 Blanchard Rd., Burlington, MA

Presented by Ventacity Systems

All proceeds will be donated to:

Participants will learn:

- What are high performance buildings and high performance ventilation
- Why efficiency matters: HRVs, ERVs, Cross-Flow, Wheels
- Best practices for building types
- Ventilation standards -- where we are, where we are going
- Duct design and control options
- Controls for CAV, DCV, VAV flow options, and building control integration
- Retrofit opportunities utilizing DOAs and high performance H&C

Registration Deadline: April 1, 2018

Class size is limited. Please complete and return the registration form by April 1st to ensure your seat. Questions? Call Sharon at 781-273-2050.

Just \$99!

*Includes lunch.
All proceeds will be donated to
Passive House Massachusetts.*

Qualifies for 6 CE's for
PIE for engineers
and architects.

Qualifies for 6 CEs for PIE for engineers and architects.
